Welcome to Dent Design Hardware

Welcome to Dent Design Hardware

From the 19th to the 21st century, Dent Design Hardware has led the way.

We are an American company producing the finest refrigeration hinges, safety latches, and other industrial-grade hardware.

FOUNDING

Dent Design Hardware began in 1894 as Dent Hardware in Newark, N.J. The company was founded by Henry H. Dent and his partners, Mr. Kaiser and Mr. Newhard.

Henry H. Dent

Shortly after incorporation, the company relocated to Fullerton, Pennsylvania where Dent served as president of the company. Dent utilized his “keen discrimination and unfaltering energy in the successful conduct of what has become one of the leading and most productive industries in the region,” according to the Encyclopedia of Pennsylvania.

EARLY YEARS

Through the 1920s, Dent Hardware served as the nation’s leading manufacturer

Early Billhead

of ice boxes, the precursor to the refrigerator. Now, decades later, Dent is the industry expert on refrigeration hinges and door latches, using sustainable business practices and continuing to employ American labor in Pennsylvania.

Welcome to Dent Design Hardware

Page from Early
Dent Catalog

STEPPING OUT ALONE

In 1955 the Dent family sold its share of Dent Hardware to its partners in the Newhard family. Harry C. Dent, grandson of founder Henry H. Dent, went on to form his own company, Dent Manufacturing, Inc. in Northampton, Pennsylvania. Over the next decade, the business rapidly expanded its facilities to include 22,000 square feet of space.

EXPANDING THE BUSINESS

Douglas Dodge of Syracuse, NY joined Dent Manufacturing in 1972 in an engineering position. Dodge became general manager just a few years later. Looking to retire after a long and successful run with the business, Hal Dent, great-grandson of the founding Dent, sold Dent Manufacturing to the Dodge Family and a small portion of the company to several employee and supplier stockholders.

LOOKING TO THE FUTURE AND HONORING THE PAST

Dent Manufacturing restructured in 2007 under the name Dent Design Hardware. In the spirit of family tradition, Dodge's son, Timothy Dodge, now manages the business. Dent remains a trusted name in refrigeration hardware and is a leader in the industry.

Despite our production of new, innovative and sustainable products, Dent still receives many requests for replicas of the classic vintage hardware featured in our 1911 and 1948 catalogs. We are proud to produce durable and timeless classics.

Refrigerator Hinge

ORDERING INFORMATION

Welcome to Dent Design Hardware

**For your ordering convenience,
the following information is provided:**

Hinges Direction of Operation—to determine the proper direction of operation (right hand vs. left hand). When facing unit from the outside, right hand doors will have hinges mounted on the right, while left hand doors will have hinges mounted on the left.

Hinges requiring **RIGHT HAND** or **LEFT HAND** designation may be grouped for quantity price on purchase order. specify the exact quantity required of either the right or left hand swing.

Please specify the following for each item ordered:

(Please refer to product listing for which specifications are needed for each item.)

- 1. PRODUCT NUMBER ***
- 2. PRODUCT NAME ***
- 3. Offset** (example: flush, 1 1/8", ... 2")
- 4. Finish** (example: brushed, polished, etc.)
- 5. Right or left hand mounting**
- 6. Wall and/or door thickness**
- 7. With/without keyed cylinder lock**

* Required for all items

For minor offset variations, **SHIMS** are available for most of the hardware shown in this catalog.

Advise shipping instructions. **ALL STOCK ITEMS** are cataloged, however, delivery is subject to prior sale.

SAMPLES are furnished on request. Contract purchases may be negotiated.

**DENT SPECIALIZES IN THE DEVELOPMENT OF ORIGINAL HARDWARE TO
INDIVIDUAL CUSTOMER SPECIFICATIONS.** Submit a sketch, drawing, or sample of
your part, including estimated annual usage.

TERMS OF SALE

Terms of sale are as follows:

Net 30 days, subject to credit approval. FOB Dent Design Hardware (Orders are accepted only on these conditions; any modification of terms and/or conditions on customer purchase orders notwithstanding.)

Prices are subject to change without notice. In periods of gyrating metal markets, surcharges may be used.

All claims must be made upon receipt of goods.

Claims for damaged goods or missing cartons must be filed with the carrier within 5 working days of the projected delivery date.

No goods are to be returned without authorization. Returned goods are subject to a 25% restocking charge, plus charges for restoring hardware to saleable condition.

Cancellation of orders will not be accepted except on such terms as shall protect the company.

Orders are acknowledged with approximate shipping dates, which the company intends and endeavors to meet. The company will not be liable for delays in manufacturing or delivery.

The company reserves the right to modify specifications if improved materials become available, or better methods of production are devised. At all times, we will endeavor to advise customer of changes prior to processing the order.

Clerical or typographical errors on acknowledgements are subject to corrections.

Taxes or other government charges on production, sales, and/or shipments of goods sold, now imposed, or hereafter becoming effective, shall be paid by the purchaser.

CONTENTS

Welcome to Dent Design Hardware

This catalog uses a simple color coded guide along the pages outer edge.

HINGES

HANDLES & MAGNETIC DOOR HARDWARE

PULL HANDLES

LATCHES

TRAPS, VENTILATORS & MISC.

Never hesitate to call us at Dent Design Hardware if you have any questions about our catalog or products.

HINGE SELECTOR CHART

Instructions on reading the chart:

Start with door weight (far left side of chart).

Find door width, in inches, at the bottom of the chart.

Cross column and row – this provides a recommended category of hinge (pair) that will support the door.

D-61-S Spring-Assisted Cam-Lift Hinge

SPECIFICATIONS

Overall Length: 5-1/8"

Material: Aluminum

Finishes: Polished Aluminum
Brushed Aluminum
*Other finishes available

Offsets: Flush

Screw Holes: 1/4" Hole, 82° Countersunk

Shipping Weight: Aluminum 1.8 lbs / pair

Hinge Load Capacity: Aluminum 150 lbs / 1 pair for a 3' door

D-69 Reversible Self-Closing Cam Lift Hinge

HINGES

FEATURES

- Reversible swing
- Contemporary styling
- Self-lubricating, wear-resistant Nylon and Delrin cams
- 1/2" lift
- Easy opening, smooth self-closing action
- Lift off capability
- Corrosion-resistant alloy
- Freezeproof, no matter how it's cleaned
- Lightweight design saves freight and handling costs
- Longlife, tested 1 million cycles
- Designed especially for foam construction

D-170 Drawer and Door Pull Handle

SPECIFICATIONS

Overall Length: 6"

Material: Aluminum

Finishes: Polished Aluminum
Brushed Aluminum
*Other finishes available

Screw Holes: No. 10 Screw

Shipping Weight: Aluminum 0.16 lbs / each

D-175 Pull Handle

PULL HANDLES

FEATURES

- No cracks or crevasses - food safe!
- Perfect for magnetic door walk-in refrigerators, freezers and sliding doors
- Easy-grab pull - lots of clearance
- Mounts vertically or horizontally
- Popular finishes to choose from - mirror polish standard
- High strength, corrosion-resistant stainless steel 316
- Only solid, food safe stainless steel handle on the market

D-175 Pull Handle

SPECIFICATIONS

Overall Length: $8\frac{1}{4}"$

Material: Stainless Steel 316

Finishes: Mirror Polished Stainless Steel
Brushed Stainless Steel

*Other finishes available

Screw Holes: 1/4" or 6mm, 82° countersink

Shipping Weight: Stainless steel 1.2 lbs each

D-182 Pull Handle

PULL HANDLES

FEATURES

- Reasonable Accommodation for ADA compliance - no fingers needed
- Easy-grab pull with wrist or forearm - lots of clearance
- Use for cleanrooms where hands or gloves must not contact handle
- Perfect for magnetic door walk-in refrigerators, freezers and sliding doors
- Typical vertical mounting for swing doors
- Typical horizontal mounting for sliding doors
- High strength, corrosion-resistant stainless steel 316
- No cracks or crevasses - food safe!
- Only stainless steel pull handle like it on the market

D-182 Pull Handle

SPECIFICATIONS

Overall Length: 10 5/8"

Overall Width: 3"

Handle Clearance: 3"

Material: Stainless Steel 304

Finishes: Brushed Stainless Steel Standard

*Other finishes available

Screw Holes: 1/4" or 6mm

Shipping Weight: Stainless steel 2.2 lbs each

D-300 Slim Line Pull Handle

FEATURES

- Attractive, slim line design
- Concealed hole mounting
- Ideal for commercial refrigerators and freezer applications
- Custom finishes available
- High strength, corrosion-resistant alloy

D-300 Slim Line Pull Handle

SPECIFICATIONS

Overall Length: $13\frac{5}{16}"$

Material: Aluminum

Finishes: Polished Aluminum
Brushed Aluminum
Endurakote Nylon

Screw Holes: Drilled and tapped for $\frac{1}{4}"$ - 20 Screw

*Thru holes standard, blind holes optional

Shipping Weight: Aluminum 0.3 lbs / each

D-55 Safety Latch

FEATURES

- Complete assembly includes latches, strike, and safety releases
- Push-knob inside safety release assures instant access to outside when latched, key locked, padlocked, or both
- Long life operation, only 3 moving parts
- Easy opening and closing
- Available with keyed cylinder lock
- Padlocking provision, 3/8" diameter
- High strength, corrosion-resistant alloy
- Stainless Steel internal moving parts
- Also available:
 - Light or heavy spring pressure
 - Inside safety release labels
 - Mounting template drawings
 - Interchangeable hole patterns

D-55 Safety Latch

SPECIFICATIONS

Overall Length: 12-5/8"

Materials: Aluminum

Finishes: Polished Aluminum
Brushed Aluminum
Cast Aluminum
Endurakote Nylon

Offsets: Flush, 5/8"
*Other offsets available (specify)

Screw Holes: 1/4" Hole, 82° Countersunk

Shipping Weight: Aluminum 3.5 lbs / each

Note: When ordering, specify with or without lock, flush or offset, finish, and door thickness.

D-60 Positive Safety Latch

FEATURES

- Easy opening and closing, only 3 lbs. pull required
- Trouble-free operation, only 3 moving parts
- Tamperproof security feature, hidden rear mounting screw prevents latch removal
- Complete assembly, latch, strike, and release
- Available with keyed cylinder lock
- Padlocking provision, 3/8" diameter
- Safety release doubles as closing pull handle
- Gentle push safety release assures instant access to outside when latched, key locked or padlocked
- Adjustable strike, graduations 1/20" to compensate for gasket wear
- Unique strike design eliminates side thrust on door

D-60 Positive Safety Latch

SPECIFICATIONS

Overall Length: $12\frac{9}{16}"$

HINGE SELECTOR CHART

Instructions on reading the chart:

Start with door weight (far left side of chart).

Find door width, in inches, at the bottom of the chart.

Cross column and row – this provides a recommended category of hinge (pair) that will support the door.

POUNDS

INCHES

Alternatively, multiply door weight (in pounds) by Door Width (in inches) and find recommended hinges on chart below

Min	Max	Typically a Reach In Door	Competitor Category
240	1380 R-1	Typically a Reach In Door	A
1440	2400 R-2	Typically a Reach In Door	B
2520	3960 R-3	Typically a Reach In Door	C
4080	7980 W-1	Typically a Walk In Door	D
8100	9900 W-2	Typically a Walk In Door	E
10080	13800 W-3	Typically a Walk In Door	F
13680	19800 W-4	Typically a Walk In Door	G
20160	30000 W-5	Typically a Walk In Door	H
30240	36000 W-6	Typically a Walk In Door	J
